## ITALY2INVEST

URBAN DATA INTELLIGENCE

[www.italy2invest.it](http://www.italy2invest.it)

PAGE 7

ITALY2INVEST is the first integrated platform of Urban Data Intelligence that offers data to measure **ATTRACTIVENESS**, **COMPETITIVENESS** and **WELLNESS OF ITALIAN TERRITORIES** together with the advice to support the choices of investors and policy makers. Attractiveness is a complex measure that expresses the ability of a territory to attract, enhance and keep strategic resources, capital, technologies and human resources.

The methodological approach adopted by ITALY2INVEST to measure the attractiveness provides these following steps:

- Implementation of a definitional scheme that allows to map different conceptual fields of a territory's attractiveness in a multidimensional way
- Identification of **8 domains** that contribute to the determination of attractiveness
- *Data collection strategy* that has identified and systematized **22 public and private sources** with municipal data
- Database design including **250 indicators** for **7998 Italian municipalities**
- Implementation of an algorithm of data reduction to simplify data into summarizing indicators for each domain and into NOMISMA I2I SCORE

### DATA

- Collection (+**250** indicators)
- Cleaning
- Modeling
- Reduction
- Transformation

Data  
preparation
